Reasons for Allowance

1. Claims 1-37 are allowed, and claims 38-49 are cancelled.
2. The following is an examiner's statement of reasons for allowance.

Arguments in appeal brief filed on 6/12/06 are:

1) One crucial difference between the teachings of Starr et al., '581 and the present invention is that the present invention, as recited in claims 1, 17, 33 and 37, stores the context information both in the system memory and in the cache memory. By contrast, Starr et al., '581 store the CCBs only in the CCB cache and not in the host storage unit. Moreover, CCB stores only the data of the packet themselves, not the context information about the connection along which the packets are exchanged.

2) Starr in view of Dobbins fails to teach the tables in cache memory having entries indicating the context information of the respective transport service instances, indexed by a portion of the service instance numbers as recited in claim 2. Because, Dobbins teaches the index of the information in the cache is the destination address of the data packet. By contrast, the indices of the present invention are portion of the service instance numbers.

3. As to point 1) and 2), they are persuasive.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
